Light Your House and Barns—Cook Your Meals With Home-Made Acetylene

#### And Make Your Acetylene With a Pilot Lighting Plant

Pilot plants make Acetylene automatically a little at a time as you use it in your gas cooking stove and in your lights distributed throughout your house, your barns and out-buildings. You simply fill the generator with the gas-producing stone "Union Carbide" and water about once a month.

Pilot plants are approved by The National Board of Fire Insurance Underwriters.

All told, over 250,000 country homes are using Acetylene made the Pilot way.

A complete Pilot plant, consisting of generator, pipes handsome light fixtures and gas cook stove, can be installed in any country home in a couple of days' time.

Such a plant is a permanent improvement and will furnish you with the cheapest, safest and most practical light and fuel now available for country home requirements.

Write for our illustrated catalogs and descriptive booklets giving all the facts.
